**SECTION 4.0: SPECIFICATIONS/SCOPE OF SERVICES**

4.1. General: The purpose of this RFP is to obtain proposals from qualified professional firms to determine the feasibility of converting 4th Street and 5th Street between Pitkin Ave and North Ave to two-way traffic to improve neighborhood accessibility and walkability.

4.2. Study Area: The immediate study area is in Downtown Grand Junction in particular 4th Street and 5th Street. The secondary study area is Downtown Grand Junction bounded by 1st Street on the west, 12th Street on the east, I-70B Eastbound (Pitkin Ave) on the south, and US Highway 6 (North Ave) on the north. Study impacts will extend beyond the immediate study area and will be taken into account.

The following map presents the Project Study Area in greater detail:
4.3. **Background:** 4th Street and 5th Street, Ute Ave and Pitkin Ave were converted to one-way traffic in the 1950’s in order to reduce traffic congestion in the downtown core. Although these one-way street patterns efficiently served high traffic volumes for decades, their desirability has waned as the downtown area has evolved. Meanwhile, a two-way conversion trend has taken hold nationally as more cities seek to slow speeds, improve walkability and bikeability, and generally enhance local quality of life. There is also evidence that two-way streets increase the economic viability of businesses over one-ways as they provide more customer access.

The Downtown is the epitome of a live/work/play urban community. And yet, despite this seeming vitality, there are concerns regarding the walkability with the higher speed one-ways dissecting the core business district and neighborhood. As development and activity has increased in areas outside of Main Street it has led to conflict with the one-way street designs on 4th and 5th as they have poor visibility and encourage much higher speeds than would be recommended in a Downtown environment. Downtown is also an epicenter of event activity and the one-ways are an impediment to events that require street closures.

In 1981 the Downtown Development Authority was formed and in its original Plan of Development had identified the conversion of 4th and 5th Street from one-way to two-way. The idea resurfaced in the City’s Greater Downtown Plan as well as most recently in the DDA Plan of Development adopted fall 2019. Links to the two most recent plans are provided here:

- [Downtown Development Authority Plan of Development page 36 and 37](https://issuu.com/downtowngjco/docs/vibrant_together_final_plan_mid_res_digital_format/1?ff)

There is interest in determining the feasibility of converting this one-way pair. A number of key destinations are located in this area including the Grand Junction Convention Center, four 100+ room hotels, Avalon Theater, as well as key government offices and the central downtown business district which includes a mix of office, retail, residential, performance, and public spaces. Key considerations are expected to include both positive and negative impacts to: traffic congestion and circulation, safety, parking, bicyclists, pedestrians, transit, service provision and movement of freight.

4.4. **Study Participants:** Study participants include, but are not limited to, representatives from: Grand Junction Downtown Development Authority, City of Grand Junction, Colorado Department of Transportation, Mesa County Regional Transportation Planning Office, and Grand Valley Transit and key neighborhood stakeholders.

A Project Advisory Committee consisting of the Study Participants will provide continuity and oversight.

4.5. **Study Tasks:**

The following scope of services is required for the 4th Street / 5th Street Two-Way Conversion Study:

4.5.1. **Study Coordination.** Conduct a minimum of four Project Advisory Committee meetings, including the kickoff meeting, over the course of the project. Additional
meetings/interviews with relevant individuals and organizations may be necessary.

4.5.2. Existing Conditions Analysis  The selected consultant will need to prepare an analysis of existing conditions:

4.5.2.1. Inventory available data. (e.g., traffic volumes, turn movements, accident rates, parking utilization, transit boardings/alightings, passenger and commercial loading activity, bicycle/pedestrian volumes, etc.) and identify gaps in information, if any.

4.5.2.2. Collect data where desired but currently unavailable or outdated.

4.5.2.3. Analyze existing conditions to produce multi-modal Levels of Service for all street segments and intersections in the Study Area.

4.5.2.4. Provide Existing Conditions Analysis report to Project Advisory Committee for review and comment.

In conjunction with this task, the Consultant will conduct the first of two Public Meetings to solicit input on issues and needs related to traffic circulation, parking, and multi-modal considerations in the study area.

4.5.3. Future Conditions Forecast

Changes are underway in Downtown Grand Junction, including development of new office space, new housing units, and proposals for an additional hotel, and public space.

4.5.3.1. Using reasonably-expected growth and planned improvements, forecast future traffic conditions in the Study Area based on the data collected in Task 4.5.2. The Mesa County Regional Transportation Planning Office (RTPO) maintains a regional travel model with a current horizon year of 2045. RTPO staff will provide travel model output to inform the forecasting process.

4.5.3.2. Provide Future Conditions Forecast report to Project Advisory Committee for review and comment.

4.5.4. Feasibility Assessment Based on the findings of Tasks 4.5.2 and 4.5.3, determine the feasibility of converting the existing one-way couplet of 4th Street and 5th Street into two-way streets under a select number of scenarios. Consultant shall use Synchro supporting current Highway Capacity Manual (HCM) methodology (not the Intersection Capacity Utilization (ICU) method), for traffic modeling purposes. SimTraffic is preferred for simulations of the network. Suggested scenarios for analysis includes: existing and future for options 1 and 2 (four scenarios). Consultant shall determine whether scenarios should include AM, mid-day, and PM or whether the highest volume scenario would suffice. The potential audiences for SimTraffic animations include the Owner, Project Advisory Committee, and the public.

4.5.4.1. Option 1: (Conversion to two-way) Where two-way conversion is feasible, produce a draft concept-level plan for implementation including necessary traffic signal modifications, roadway geometric changes, parking impacts, bicycle/pedestrian enhancements, etc., and related costs.

4.5.4.2. Option 2: (Enhance multi-modal accessibility and improve bike/ped). Where infeasible, recommend draft alternatives to enhance multi-modal accessibility.
and improve the bicycle/pedestrian friendliness of the district, and related costs.
